## ***Radial Fuse Assembly Machine***

### **Machine description**

- Main drive and fuse wire insertion with servo motors
- Cap & base feeding systems through a bowl feeder out of bulk material
- Solder station with electronic temperature control
- Various mechanical and electrical measuring stations for assuring
- Quality while production
- Sorting system for accepted and rejects
- Useable types of fuse wire: wound fuse wire
- Electronic programmable control system with LCD display

### **General machine equipment**

- Machine frame made out of aluminium profile; Cover: colour blue
- Machine dimensions L x W x H in mm: approx. 1300 x 1000 x 1900
- Machine weight: approx. 450 kg

### **Production speed rate**

- Approx. 2.400 parts/ h

### **Options**

- Protection Plexiglas covering around the working area
- Sand filling station
