

Customized Solutions for Electronic Industry

## *TSM-40*

### **LED Test & Sorting Machine**

The machine is able to measure the optical and the electrical parameters of LED`s and to sort the components into pre-selectable parameter groups.

We are specialized in

Radial Taping

Blister Taping

Fuse Assembly

Test & Sorting

## LED Test & Sorting Machine

### Machine description

- Main drive with servo motor
- Feeding LED`s out from a bowl feeder or punching LED`s out from leadframe
- Electronic microprocessor control system with visual screen software for the controlling and sorting
- Sorting the LED`s in up to 30 different groups
- Barcode reading unit
- Electronic programmable control system with LCD display

### General machine equipment

- Machine frame made out of aluminium profile; Cover: colour white
- Machine dimensions L x W x H in mm: approx. 2600 x 800 x 1900
- Machine weight: approx. 600 kg

### Production speed rate

- Depends on the measuring processes approx. 10.800 pcs/h

### Options

- Protection Plexiglas covering around the working area
